

## Fire & Emergency Segment Announcement

October 7, 2009

This week, Oshkosh Corporation concluded the sale of BAI (Brescia Antincendi International S.r.l.), Oshkosh's Italian fire truck subsidiary, to its original owners in Italy. Since 2004, BAI was a subsidiary of the Oshkosh Corporation Fire & Emergency Segment, providing fire apparatus and equipment primarily in Western Europe.

Oshkosh Airport Products and Pierce will continue their relationship with BAI offering components to market their ARFF, the Striker E™. During the transition, if you have questions, please contact either your supervisor or Tom Adrians.

We recognize there are significant global fire and emergency opportunities, and will continue to pursue our global leadership presence with Oshkosh and Pierce fire and emergency apparatus.

Thank you for your cooperation during the transition.

Wilson Jones  
President  
Fire & Emergency Segment

Tom Adrians  
Vice President of Finance  
Fire & Emergency Segment
